Hi all,

Happy New Year, we have received in the last week agreement for £7.5k of additional funding towards our polytunnel which will allow us to fund a large growing tunnel 7m by 24m. This will help us to run more community activity as it will give us more diverse space. Having had various conversations with people and looking for the best location and to fit with potential future activities in the field we believe the best location is as shown on the map. The red areas are the current cultivated areas, the orientation is so that the tunnel is side on to the prevailing winds

As with our other activity we will order a tunnel that can be erected using ground anchors rather than requiring concrete footings for the frame, this will allow the structure to be dismantled without leaving anything in the ground. I have attached drawings of the tunnel.

Before we proceed I wanted to ensure this was okay with the council. We need to spend the money and have the tunnel erected by the end of February inline with the funders requirements.

Thank you,  
Adam
